

PATRICK GRAHAM

SKILLS

Python · TypeScript · JavaScript · C# ·
PHP · SQL · React · Next.js · Angular ·
Svelte · SvelteKit · Three.js · WebGL ·
Electron · Node.js · FastAPI · .NET ·
ASP.NET Core · Entity Framework Core ·
LINQ · REST APIs · Web APIs ·
Microservices · PostgreSQL · MySQL ·
SQL Server · Machine Learning ·
LLM Integration · RAG · AI Agents ·
OpenAI API · Claude API ·
Data Processing · Model Evaluation ·
API Integration · 3D Web Development ·
Interactive 3D · Web Animations ·
WebSockets · Docker · Kubernetes · AWS ·
Azure · Git · CI/CD · System Design ·
Software Architecture ·
Full-Stack Development

KEY ACHIEVEMENTS

98% Client Success Rate
Consistently delivered production-ready AI, full-stack, and cloud applications, translating complex technical requirements into reliable, maintainable software.

8+ Years of Engineering Impact
Built end-to-end systems spanning LLMs, RAG, AI agents, APIs, microservices, modern web applications, and interactive 3D experiences.

EDUCATION

**Bachelor of Technology,
Computer Software
Engineering**
North Carolina State University
03/2017 - 09/2020 North Carolina

Senior AI & Full-Stack Engineer

North Carolina, United States Skiing & Alpine Sports

SUMMARY

Senior Full-Stack AI Engineer with 8+ years of software development experience and a 98% client success rate, specializing in production AI systems, scalable web applications, APIs, and cloud-native architecture. Strong in Python, C#/.NET, TypeScript, React, Next.js, Node.js, FastAPI, Three.js, and WebGL, with expertise in LLM applications, RAG, AI agents, microservices, and API integrations. Proven ability to architect, build, deploy, and optimize end-to-end AI, full-stack, and interactive 3D systems.

EXPERIENCE

Senior Full Stack AI Engineer 06/2024 - 05/2026
Ptolemy LLC Walnut, California

- Developed AI-powered applications spanning frontend interfaces, backend services, and LLM integrations.
- Translated business requirements into practical product features and maintainable application functionality.
- Built application features connecting user-facing interfaces with backend and AI services.
- Integrated LLM capabilities into software workflows and product experiences.
- Contributed across the full application stack, including frontend, backend, APIs, and AI components.
- Supported architecture and implementation decisions for production AI-enabled applications.

AI / Machine Learning Engineer 07/2021 - 05/2023
SolidBrain Austin, Texas

- Developed machine learning workflows covering data preparation, experimentation, model evaluation, and application integration.
- Built Python-based functionality supporting machine learning and backend application requirements.
- Prepared and processed datasets for model experimentation and development workflows.
- Evaluated model behavior and supported iterative improvements to ML functionality.
- Integrated machine learning capabilities into backend and application workflows.
- Worked across machine learning and software engineering to turn models into usable application functionality.

Full Stack Developer 09/2018 - 02/2020
DataArt New York, United States

- Developed full-stack application features based on business and product requirements.
- Translated requirements into maintainable frontend components and backend services.
- Worked with JavaScript frameworks and Python across application development.
- Connected frontend interfaces with backend business logic and application services.
- Supported application development, debugging, maintenance, and performance improvements.
- Contributed across both client-side and server-side development.
